INFORMATION**

Designed for C&I Applications

From manufacturing and cold storage to multi-tenant buildings and critical infrastructure—deployable across North America.

Built-In Smart Control Modes

Seamlessly support peak shaving, demand charge reduction, energy arbitrage, backup power, and black start capability—right out of the box.

Flexible, Modular Design

Easily scale from 125 kW / 277 kWh and up with plug-and-play parallelization.

Grid-Interactive Ready

Supports grid-forming, islanding, and smooth PV integration—ideal for hybrid microgrids and critical load support.

Liquid-Cooled for Performance & Longevity

Advanced thermal management ensures high reliability in tough environments.
